

Flush Wall / Soffit

Flush Wall/Soffit is a concealed fastener system renowned for its sleek minimalistic appearance. This low-profile panel stands as an excellent choice for various projects. Traditionally used for roofing eaves and as part of a venting system with a ridge cap, it has gained popularity in siding, ceiling, and accent applications.

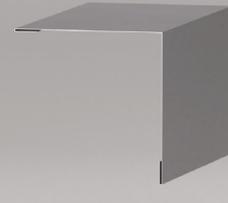

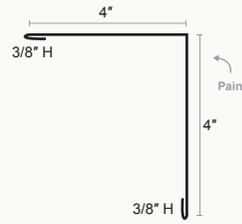

Featuring a broad spectrum of colors and finishes, Flush Wall/Soffit serves multiple purposes, from ceiling panels to wall coverings and wainscots.
